OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Pink salmon	August 1995	XXXXXX			

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Foot survey conducted in August of 1995 after reports of pink salmon observed by Denby Lloyd, former ADF&G biologist. Pink salmon were observed to a point approximately 1/2 mile from Turnagain Arm. Over 100 pinks were observed spawning in this portion of Peterson Creek.

Name of Observer (please print)- Stewart Seaberg

Date: 2/21/97 Signature: Stewart Seaberg

Address: ADF&G, Habitat and Restoration Division
333 Raspberry Road
Anchorage, AK 99518-1599

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: _____

usually not the
ent of fish habitat.

A hand-drawn map of the Seward District. The map shows a river flowing from the top left towards the bottom right. A road, labeled 'Rd' at its end, runs horizontally across the middle of the map. A building is drawn on the left side of the road. The name 'Seward District' is written in large, red, cursive letters across the top of the map. The number '25' is written in the top right corner. The map is drawn on a piece of paper with a grid pattern.
